

Liito-orava

Siberian flying squirrel

Polatouché de Sibérie

Pteromys volans

This arboreal, nocturnal rodent lives in boreal mixed forests and nests in tree cavities and nest boxes.

Korvaslipiä

Bechstein's bat

Murin de Bechstein

Myotis bechsteinii

This medium-sized bat with large and long ears lives in mature woodland and roosts in tree holes and nest boxes.

Kalkkikääpä

Polypore Antrodia crassa

Antrodia crassa

Antrodia crassa

This rare polypore lives on fallen pine logs.

Maakotka

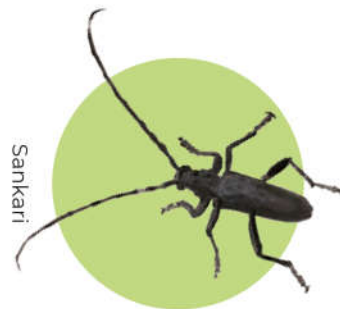

Golden Eagle

Aigle royal

Aquila chrysaetos

Golden eagles can nest in manmade nest sites built on trees.

Sankari

Great capricorn beetle

Grand capricorne

Cerambyx cerdo

The larvae develop in hollow trees, often oak trees.

Valkolehdokki

Lesser Butterfly-orchid

Platanthère à deux feuilles

Plantatthera bifolia

These night scented orchids are protected in Finland. They grow in the forests.

Helmisilisko

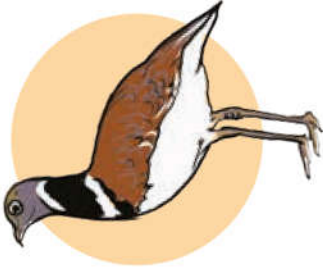

Ocellated Lizard

Lézard ocellé

Timon lepidus

Measuring up to 90cm at adult age, this is the biggest lizard living in Europe.

Pikkutrappi

Little bustard

Outarde canepetière

Tetrax tetrax

This bird affectionates cultivated grasslands and can be reintroduced by cutting down the trees.

Mehiläisorho

Bee orchid

Ophrys apifera

Ophrys apifera

This plant attracts its pollinators by imitating the smell and the shape of a female bee.

Huopahdake

Melancholy thistle

Cirse à feuilles variables

Cirsium heterophyllum

Unlike other thistles, this one does not have any spines to protect itself from herbivores.

Jouhietakkyhky

Pin-tailed sandgrouse

Ganga cata

Pterocles alchata

The cryptic plumage of this bird makes it very difficult to observe on the ground.

Tummaverkkoperhonen

False heath fritillary

Damier noir

Melitaea diamina

This butterfly lives in damp flowery meadows, woodland margins and rides from low to alpine levels up to 2200 m

Viitasammakko

Moor Frog

Rana arvalis

Moor frogs prefer humid habitats, and breed in ponds.

Grenouille des champs

Kirjojokikorento

Green Gomphid

Ophiogomphus cecilia

Green gomphid lives in clear, swift streams with sandy or rock bottoms.

Gomphe serpentin

Jätisukeltaja

Broadest Diver

Dytiscus latissimus

This big, predatory diving beetle lives in dense vegetation, at the edges of lakes and in deep ponds.

Grand dytique

Marmorimantteri

Marbled Newt

Triturus marmoratus

Living in dark and humid environments, the marbled newt orientates with the stars to reach its breeding pools.

Triton marbré

Saukko

European Otter

Lutra lutra

The European otter needs connected waterstreams and non-constructed banks for its habitat.

Loutre d'Europe

Lohi

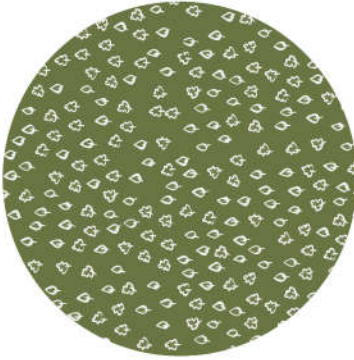

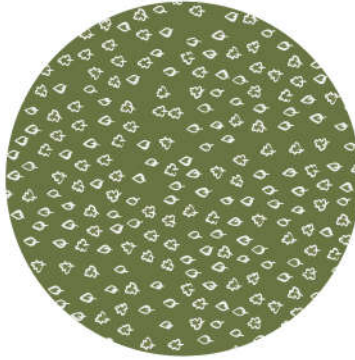

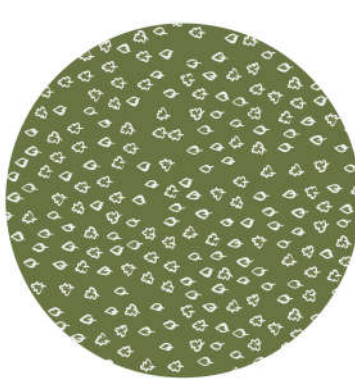

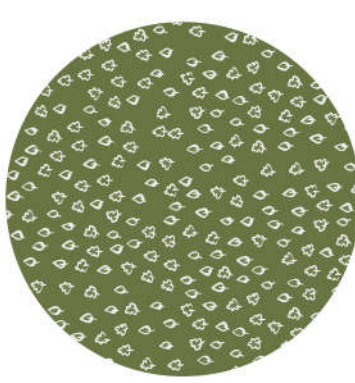

Atlantic Salmon

Salmo salar

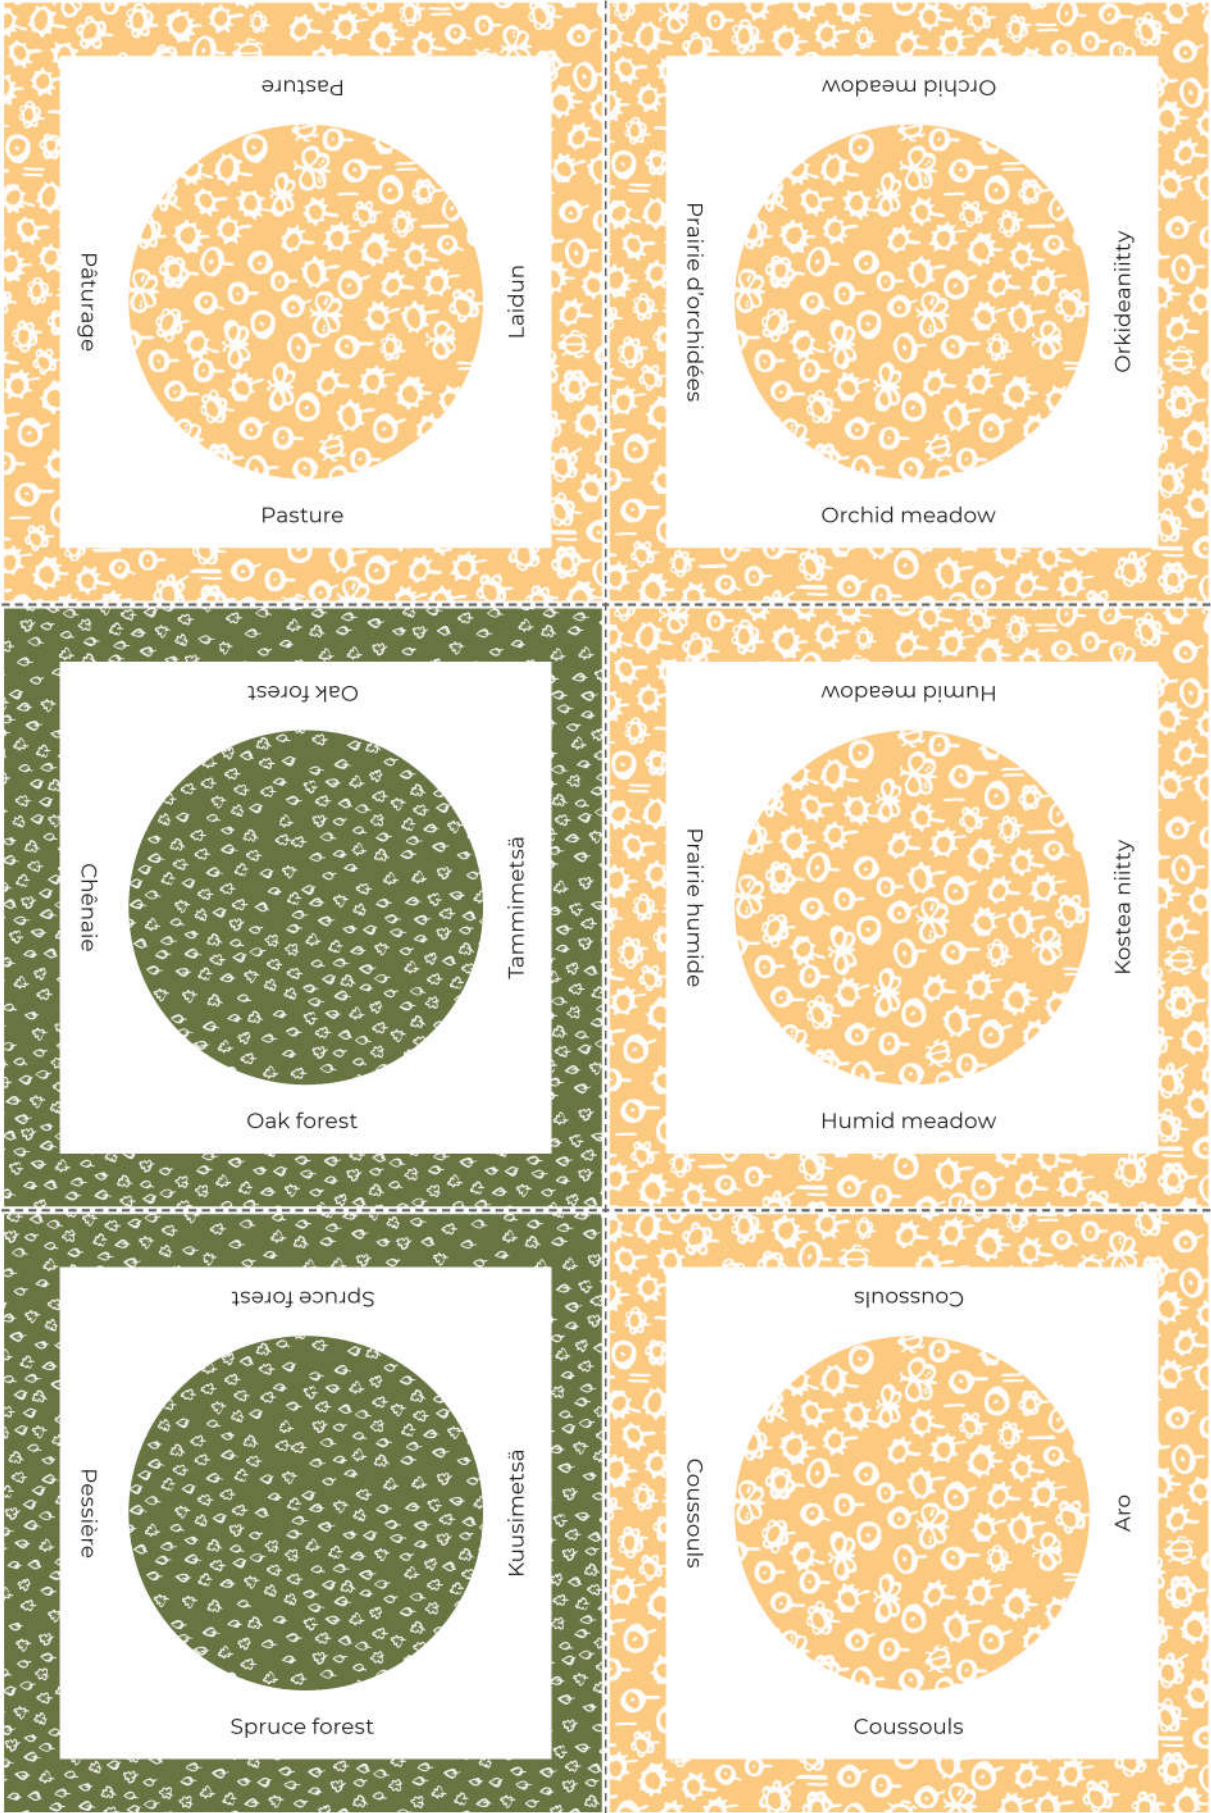

The Atlantic salmon needs fish ladders to circulate freely in constructed waterstreams.

Saumon Atlantique

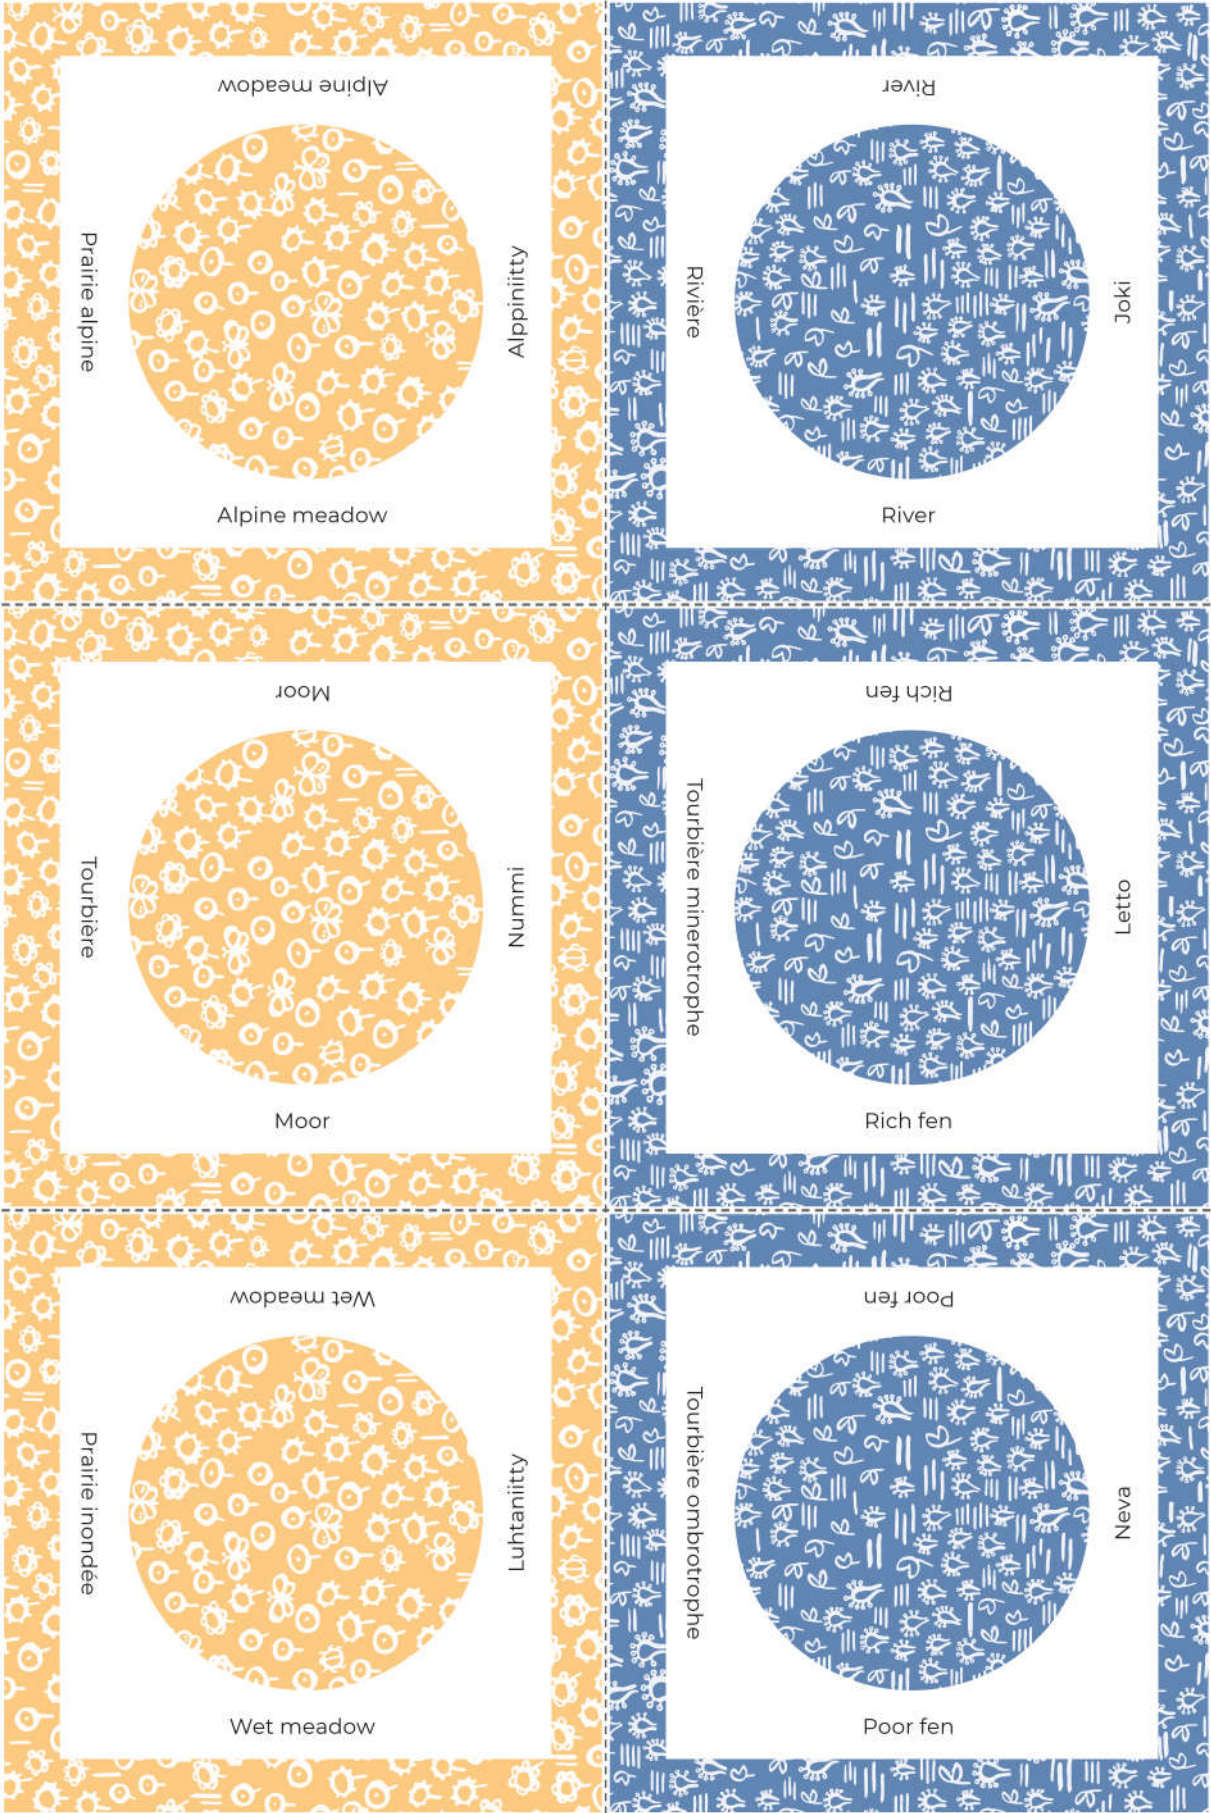

Beech forest Pyökkimetsä  Hètraie Beech forest	Mixed forest Sekametsä  Forêt mixte Mixed forest
Najas tenuissima Najas tenuissima is a rare water plant, present in 16 lakes in Finland.  Hentonäkinruoho Najas	Pine forest Mäntymetsä  Pine forest Pinède
Freshwater Pearl Mussel <i>Margaritifera margaritifera</i> Found in clear waterstreams, this mussel can live up to 100 years and used to be exploited to produce mother-of-pearl.  Jokihielmissimpukka Mulette perlière	Leaf tree forest Lehtimetsä  Forêt decidue Leaf tree forest
