

THE DIGINURSE PROJECT STATEMENT

A new approach in health care is needed to effectively face the growing demand for tailor-made and patient-centered care in the coming years, by providing smarter care, from a distance (online or digital), with more focus on prevention and early detection as well as treatment compliance.

The challenge will be to **provide more and better quality care within the same resources**, as people are growing older and are developing more chronic illnesses.

Information and communications technologies (ICT) can contribute to the development of an integrated care model, where patients are encouraged to actively participate in their health care process. As such, a patient becomes co-pilot in the management of his chronic illnesses and needs to be supported by his health care team.

However, education institutions of health professionals need to integrate the smart use of these ICT into their curriculum, so that students will be future-proof and ambassadors of self-management support.

DigiNurse

PROJECT IMPLEMENTATION PERIOD
01-09-2017 to 31-08-2020

Total eligible investment
330.657,00 €

PROJECT CONSORTIUM

Support from:

FCT Fundação
para a Ciência
e a Tecnologia

Co-financed by:

OPETUSHALLITUS
UTBILDNINGSTYRELSEN

Erasmus+

DIGINURSE PROJECT

Learning ICT Supported
Nursing for Self-
Management of Patients

THE DIGINURSE PROJECT'S INTELLECTUAL OUTPUTS

① THE MODEL

The DigiNurse Model main goal is facilitating nursing students to learn how to support selfmanagement of patients more efficiently by the development of student's digital competences.

DigiNurse will better prepare students by taking up an active role in the coordination of care for persons with complex and chronic care demands.

② THE COMMUNITY

The DigiNurse Community is a community of teaching and training professionals in the field of nursing. The community gathers the professionals and experts who are interested in including modern digital methods into nursing training and education.

The community serves as a platform to spread new ideas and digital innovations in the nursing field.

③ THE GUIDELINES

The DigiNurse Guidelines are a collection of practical instructions and best practises of how to use the DigiNurse model in the nursing education.

The guidelines are used by the DigiNurse Community members when they implement courses or training for the nursing students
