

Initiative 2:

Pirkanmaas co-operative cultural centres (1/2)

Description

Many initiatives in civil society in Pirkanmaa are helping to improve the well-being of people and the planet. In Pirkanmaa we have several great examples such as Tehdas108 and Kurki ecovillage. These centres and communities combine ideas from the arts and entrepreneurship to achieve sustainability.

They develop many social innovations. Could these communities and centers be further improved through a larger network and knowledge-sharing?

Challenge

To establish and nurture cooperation between these centres and communities so they can develop ideas that cut across the arts, business and local community.

Initiative 2:

Pirkanmaas co-operative cultural centres (2/2)

For example: Tehdas108

We need...

People from these centres and communities who are open to cooperation with others. People with experience from building and supporting networks. People with experience from similar projects around Finland or the world. People with experience from academia and research in community building and sustainability.
