

BRID POL

POLICY VALUE AMIDST HYBRIDITY

OBJECTIVES OF THE BRIDPOL RESEARCH PROJECT

The purpose of Academy of Finland -funded research project **BRIDPOL - Policy value amidst hybridity** is to contribute to a novel theoretical and conceptual understanding of the links between policy-making, value creation, and hybridity, as well as to more systematically scrutinize the impacts of hybridity on the governance of algorithms, digital business platforms, and urban sustainability.

1. Connecting policy research and hybrid governance

How society level policies are influenced by hybridity?

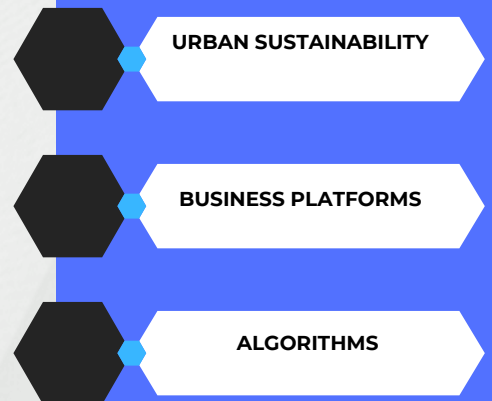

2. Understanding policy value amidst hybridity

What are the most important synergies and problems of value constellations under hybridity?

3. Exploring policy mechanisms of value creation

What are the policy mechanisms of value creation and their interactions in different empirical contexts?

GOVERNANCE CONTEXTS AT THE FOCUS

PROJECT ONGOING 2023-2027
